Phantasma Description

We Connect – You Create and Control

Phantasma is a blockchain for content distribution of NFTs, Gaming and dApps that is fast, secure and decentralized. The governance token is SOUL and the energy token is KCAL, which allow interoperability with other blockchains, while maintaining a decentralized governance system.

With its innovative staking mechanism, dual token system and advanced smart non-fungible tokens, it allows the Phantasma blockchain to be used for digital goods and services such as communication, entertainment, NFT marketplace and on-chain storage.

Phantasma's SOUL token can be found and traded on [Kucoin](#), [Switchero](#), [Uniswap](#) and [Bidesk](#) and KCAL can be traded on [Uniswap](#).

Phantasma Facts

- Blockchain created in 2017
- Based in Portugal
- 30+ team members
- Blockchain Software Solution Provider

Chain Features

- Dual Token
 - SOUL (Governance Token)
 - KCAL (Utility Token)
- Low carbon footprint (less than 0.001x - 0.0001x compared to other blockchains)
- Staking
- Chain Swap
- Sidechains
- Gaming NFTs
- Tokenization
- Oracles
- DeFi
- Storage

- Email
- Chat
- ID

Phantasma Metrics

- 5,000 TPS – Transactions per second (very fast)
- 8 Programming Languages
- 300,000+ Minted NFTs
- 18%
- 59% Staked SOUL

Phantasma dApps

- [Pavillion](#) – Blockchain Gaming Hub
- [22 Racings Series](#) – A Blockchain enabled AAA real-time strategy futuristic racing game
- Nachomen – A Blockchain enabled fighting, trading and collecting game (coming soon)
